

What matters most to you?

SECURITY OR MANAGING YOUR RISK? Understanding the difference between security and a risk management can be a daunting task. Most people think hiring a security company to assist with personal or asset protection is the only logical choice. However, when security companies provide their consultation and service, most focus solely on just physical security measures.

While there is value in companies that provide this type of service, it is essential to understand that risk management firms approach clients and situations a little differently. When a risk management firm is requested to provide security services, it will take a far more comprehensive approach to analyze and evaluate your requirements.

Within a risk management firm, physical security is simply one component of many. Combining this component with comprehensive intelligence analysis and risk evaluations makes for an all-inclusive method to ensure the client's overall safety and security.

SECURITY. REFINED BY INTELLIGENCE. The North Group (TNG) provides risk management solutions customized from inception to resolution. While most security companies serve only one need, we manage complex projects through synergistic teams of highly specialized individuals, standing operationally ready worldwide. Our service offerings fall into multiple separate-yet-integrated divisions: Protective Services, Intelligence Services, Risk Management, and Special Projects.

We understand our clients and their families' unique challenges to provide you with discreet risk management services. Our subject matter experts come from elite careers in federal and local law enforcement, military special operations, private security, and various intelligence agencies.

Our Mission. The North Group is a purpose-driven solution based on trust. It is our mission to provide our clients with holistic and comprehensive security and risk mitigation services. We are driven by integrity and a high moral obligation to serve our communities and commit to our core leadership values.

TNG recognizes the need to mitigate risk in the lives of high-profile individuals, corporations, and organizations. Everything we do is guided by intelligence. Whether you require a protective detail, assistance investigating a complex issue, or are concerned with traveling overseas – our security professionals are there to alleviate the burden and provide peace of mind for you, your business, and your family.

Our continuous work with strategic partners allows us to afford you access to an extraordinary array of services found nowhere else within a single provider.

This book provides an overview of the TNG services most sought after by our clients. All of our offerings are customizable and adaptable to meet the demands of any individual or organization.

PRIVATE CLIENT PROGRAM

While you can always utilize any of our services based on a particular need, we also offer our more discerning clients a multi-tiered program that provides enhanced flexibility and options over a wide variety of amenities.

Select tiers include services conducted by our intelligence analysts – such as travel assessments, country briefs, cybersecurity monitoring, and more – as well as a personal Account Executive to manage our relationship. Your Account Executive is there for you 24/7. Their ability to answer your questions, address your concerns, and guide you to practical solutions, provides an unparalleled benefit.

Additionally, the tier program includes access to all TNG services at a discounted rate and the ability to subscribe on a monthly or annual basis.

5% discount of all service offerings - including CI2A CyberVIP® Protection Services

*There are places in the world you wouldn't go
without us, but there's nowhere in the world you
couldn't go with us...*

ANALYST SERVICES

Travel Assessments. International journeys can be exciting for you and your family — but traveling to countries outside your own also comes with a set of challenges and security risks. Let us help you prepare for successful travel abroad. We seek out information and intelligence about your destination area and report back to you. And to further ensure your safety, we can even provide an on-ground, advance party assessment or a personal security detail during your travels.

Country Briefs. Individuals and organizations alike may require knowledge of activities in other countries. Whether you're investing or traveling, intelligence on foreign countries provides invaluable insight into your ventures' success. Our analysts can help you understand the politics, geography, financial stability, and cultural nuances required for effective decision-making.

Secure Travel Planning. TNG provides our clients with peace of mind by securing safe, customized transportation, accommodations, and other travel services — both domestically and abroad. Unlike chauffeur, taxi, limousine, or private driver services, TNG provides safe and secure transportation through our network of vetted professionals.

Due Diligence. Keeping your organization and loved ones safe is our top priority. When it comes to background inquiries, limiting yourself to open source material can give you a false sense of security and be very risky. TNG intelligence analysts are consistently performing investigations at the next level and can provide an added layer of depth to understanding the faces closest to your business and family.

We can help you gather essential information that can strategically guide your decision making. Whether you require an evaluation of a potential business partner or assets for acquisition, exercising the necessary amount of care is what separates success from failure.

TNG specialists use multifaceted investigation techniques to pursue information concerning legal, financial, and personal matters. We assist with verifying backgrounds and statements, as well as finding missing persons, investigating cybercrimes, and more. Every investigation is unique, and TNG treats every case with the confidentiality and discretion it deserves.

*They want what you've worked for,
don't give it to them.*

CYBERSECURITY

Socially engineered malware, ransomware, and denial of service attacks are just some of the common cyber threats facing us today. Not only are highly publicized data breaches increasing in numbers, they are also increasing in severity.

TNG cybersecurity strategists can inspect current computer systems and network infrastructure to proactively protect individual assets and intellectual property. We will meet with the client to illustrate how quickly threats are detected, how efficiently they are managed, and provide dynamic and comprehensive strategies that will initiate an effective response.

As an added benefit to our Private Client Program, we include elite access to the CI2A CyberVIP® Protection Program designed to enable clients to embrace technology and live their lives without worrying about the complexity cybersecurity and technology create. These programs use social science, human intelligence, and technology based on cyber criminology and cyber victimology to move beyond keyword searches to true contextual intelligence. By analyzing concentric circles of protection, these unique programs remove the complexity of cyber overwatch for clients.

CI2A CyberVIP® C2 Victimological Profile. Proprietary contextual analysis of your cybercrime exposure and unique victimological profile including cursory digital footprint validation.

CI2A CyberVIP® Cursory Digital Footprint Validation. Cursory assessment of your unique digital footprint to validate and provide contextual intelligence.

CI2A CyberVIP® Concentrated Monitoring. Concentrated monitoring of your digital footprint based on your unique victimological profile and pattern of life exposure or your cursory digital footprint validation.

CI2A CyberVIP® Intelligence Advisory Center. Access to CI2As CyberVIP® Intelligence Advisory Center and the Cybercriminal Intelligence Analysts, Cybercriminal Researchers, and Cybercrime Prevention Specialists.

*A single vulnerability is all
that is needed.*

PROTECTIVE SERVICES

Executive Protection. TNG Executive Protection Services are structured to mitigate the ever-changing personal risks facing our clients due to their wealth, occupation, status, travel destinations, and other contributing factors. We design our comprehensive Executive Protection services to provide our client's privacy and peace of mind so they can focus on what is most important.

Workplace Security. We work 24/7 to provide you with highly qualified & vetted security personnel, up-to-the-minute intelligence assessments, and high-tech solutions to better identify and mitigate potential threats to your staff, visitors, and facilities.

Venue and Event Security. When it comes to your venue, our team's focus is on hospitality. We take pride in our customer service and professionalism while ensuring all patrons' safety and security is the utmost priority before, during, and after the event.

Security Drivers. TNG has provided drivers for celebrities, heads of state, and Fortune 500 executives. We afford clients with the option to maintain a one-time, part-time, or even full-time Executive Driver. You can trust our highly trained, screened, and experienced staff.

Estate Security. We protect our clients' loved ones and property from a myriad of threats, including home invasions, disturbances, trespassing, privacy invasions, menacing behavior, and other potential incidents. Our state-of-the-art Intelligence Division can develop threat assessments, security technology tools, best practices, procedures, and full-service physical security solutions, all aimed at mitigating your risk.

Global Crisis Management. Trusted evacuation and kidnap/ransom services are rarely discussed in daily life yet are highly valued. TNG clients benefit from a hand-picked and real-world tested team of elite professionals dedicated to protecting lives in questionable scenarios.

Complex Case Investigations. Investigating corporate fraud, legal issues, and sensitive personal matters requires a subtle approach. From detection to prevention, we have the tools to help you find the root cause of any problem. Our specialists will then develop solutions and implement them with the discretion you expect.

Protective Surveillance. TNG can provide protection when standard security methods may be intrusive or inappropriate. Our approaches consist of leveraging technology or physical surveillance strategies to develop ongoing intelligence and risk assessments while blending into the environment.

Drone Detection. The popularity of drones is ever-increasing, and we have all seen spectacular footage of skylines, beaches, and sporting events. However, using drones for nefarious purposes is on the rise, as well. Criminals have recently deployed drones to hack wi-fi networks, surveil homes and neighborhoods for vulnerabilities, as well as spy on individuals, corporations, and private events. TNG can employ cutting edge technology that detects, tracks, and reports unauthorized drones in your airspace.

Asset Transport. TNG protects more than just people. When it comes to nationwide or international business, trust our team of professionals to transport your high-value assets safely and securely.

RISK MANAGEMENT

Threat Assessments. Securing your organization's personnel and assets is a process of evolution that requires constant vigilance. Whether you're a corporate, hospitality, educational, or public entity, we offer a solution that identifies and assesses your threats, vulnerabilities, and negative opportunities. We provide you with sound strategies to improve existing security measures that will have minimal impact on business operations.

Business Continuity Planning. Through a personal analysis, TNG can provide your organization with a systematic prevention and recovery process to manage potential threats. This can allow your business to maintain its essential functions in times of crisis and enable ongoing operations before, during, and after an emergency.

Emergency Preparedness. Preparing for an emergency provides your family and organization with the information needed to effectively react when – not if – an incident occurs. The ability to assess a situation and make immediate decisions is crucial to quickly mitigate any crisis. Understanding the concepts behind the response can alleviate the stress that clouds judgment and causes the inability to react. From emergency response and planning – to active drills and exercises – our team can provide the preparedness you need.

Red Teaming. Are you curious about how your safeguards measure up to adversity? We can provide your organization with the ability to improve its response by providing tangible opposition to test your current protective measures. Through physical methods, cyber penetration testing, and alternative intelligence analysis, TNG can demonstrate how real-world adversaries exploit vulnerabilities.

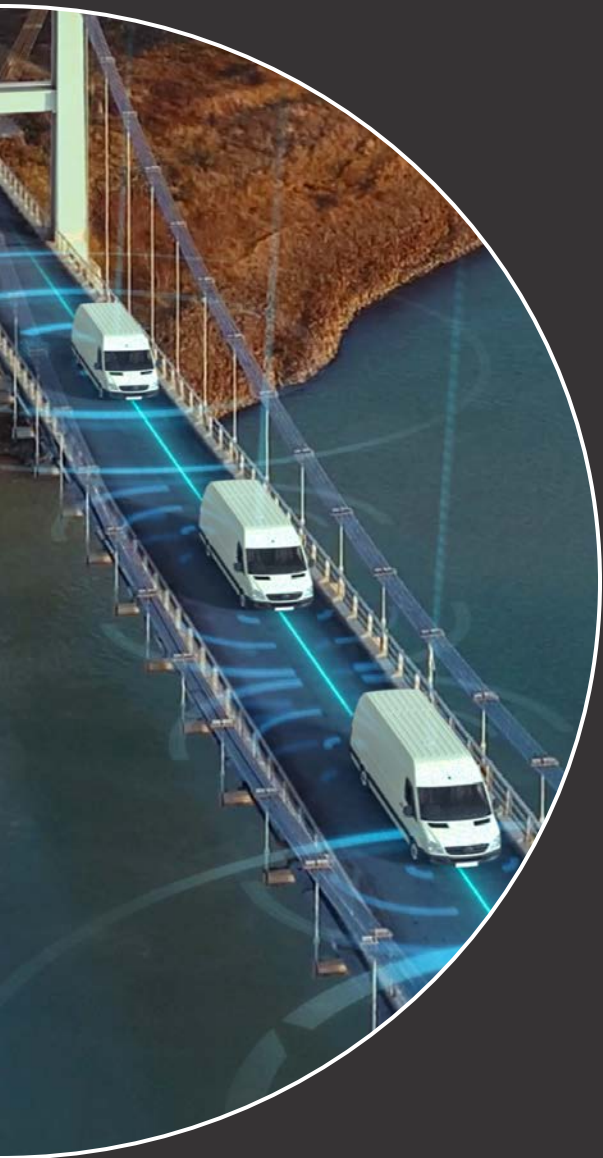

SPECIAL PROJECTS

Aviation Support. From rotary to fixed-wing charters, our staff can work with you to identify and procure your global aviation requirements.

Security System Integration. We see it every day – organizations making efforts to secure their facilities with outdated or incompatible systems. TNG specialists assist building and security managers who are seeking solutions that are easy and effective to use. From system discovery to maintenance and training, we're the extra set of eyes helping to keep you safe.

Electronic Tracking. Integrating GPS tracking or real-time locating systems into your security strategy improves situational awareness, constructs a common operating picture, and provides the ability for immediate emergency notifications. Whether you are monitoring an executive or family member traveling overseas, or a vehicle fleet transporting high-value assets, we can help you identify strategic tracking solutions that can increase your success.

Armored Vehicle Support. Many situations require enhanced considerations in securing the safety of our clients. Our access to armored vehicle capabilities can help ensure that you are protected while traveling in an adverse environment.

Thank you for taking the time to learn more about our commitment to your success. Our proven methods have shown to significantly mitigate risk over the entire spectrum of personal and professional lives.

Let The North Group provide you with peace of mind.
